EDUCATION

B.E

Ramrao Adik Institute Of Technology

07/2017 - 06/2021

Nerul, Navi Mumbai

Electronics -

- **Final Year Project** ◦ 7.41 CGPA
:Analysis of Computational Capabilities of GPU for Special Functions Related to Chebyshev Polynomials

HSC

Peoples Education Society Thane

06/2015 - 03/2017

Thane, Maharashtra

Courses

- 67%

ICSE

Smt Singhania Sulochanadevi Singhania School

06/2005 - 03/2015

Thane, Maharashtra

Courses

- 87%

PERSONAL PROJECTS

IMDb Clone App:

- A React App that can be used to search movies similar to IMDB .It was made using OMDB API and react hooks such as useState, useEffect, useContext and react-router.
- **Tech used : React, HTML, CSS, Javascript.**
- <https://boioboi16.github.io/IMDB-Clone/>

Word Hunt

- A React Dictionary App using Material UI, Free Dictionary API ,React hooks with a support of over 12 languages. It can also provide the pronunciation of the words that are entered. It also comes with a dark mode and light mode feature.
- **Tech used: React , Material UI , HTML , CSS , Javascript, React Hooks, Context API**
- <https://boioboi16.github.io/Word-Hunt/>

Final Year Project : Analysis of Computational Capabilities of GPU for Special Functions Related to Chebyshev Polynomials

- Certain special mathematical functions require a lot of computing time therefore to reduce the computing time and resources we implemented algorithms on MATLAB using MATLAB PCT to run them on a GPU so that we could use its parallel computing power and thus we were also able to see a significant speedup on the computation.
- **Tech used: MATLAB , MATLAB PCT.**

SKILLS

Java

Sql

HTML

CSS

Javascript

DSA

DBMS

React
